Operation and Maintenance Policy Statement

AMPC is committed to achieving safe, reliable, efficient, and sustainable operation and maintenance of all assets and facilities to meet business objectives, regulatory requirements, and stakeholder expectations.

Effective operation and maintenance are fundamental to ensuring asset availability, product and service quality, environmental protection, occupational health and safety, cyber security protection and cost efficiency. Accordingly, AMPC shall:

- Operate and maintain all assets in compliance with applicable laws, regulations, codes of practice, standards, and contractual obligations.
- Established and implement a structured maintenance strategy incorporating preventive, predictive, and corrective maintenance to maximize asset reliability and lifecycle performance.
- Ensure all plants, equipment, and systems are operated within approved design parameters, standard Operation Procedure and operational safety limits.
- Provide adequate resources, competent personnel, and ongoing training to support effective operation and maintenance activities.
- Apply risk-based planning, asset criticality assessments, and condition monitoring to prioritize maintenance and operational controls.
- Promote a strong safety culture to prevent injuries, occupational illnesses, incidents, asset damage, and environmental impacts.
- Monitor, measure, and analyse operation and maintenance performance using key performance indicators (KPIs) and management reviews.
- Drive continual improvement through audits, inspections, root cause analysis, lessons learned, effective planning inventory management and the adoption of best practices and appropriate technologies.
- Encourage employee engagement, communication, and accountability in achieving operation and maintenance excellence.

Top Management is fully committed to providing leadership and support to ensure this policy is communicated, implemented, maintained, and periodically reviewed for continued suitability and effectiveness.
